[Job Report →](#)

TapRecruit is looking for a smart, detail-oriented person to serve as a senior financial analyst. This person will be responsible for supporting the company's FP&A requirements. Responsibilities will include working on TapRecruit Entertainment Group's FP&A model, supporting analysis for long-term planning, tracking key business operational metrics and producing monthly financial/operational reports. The role will require strong organizational skills to help manage the senior managers across the department and evaluate/implement management. This is a dynamic role that serves the finance department of Finance and will routinely interface with TapRecruit's top management. Language that emphasizes an "intense" or "confusing" environment is known to deter qualified candidates.

[Delete](#)

This is an ideal position for an individual who has gained strong accounting firm and now seeks to apply those skills to a fast-growing entrepreneurial company. Strong quantitative and excel financial modeling skills are a must. The ideal candidate must be comfortable in a dynamic start-up environment, will bring energy and passion to everything he/she does, and will not be afraid to roll up his/her sleeves to tackle challenging analytical assignments.

This job is full-time, based in Los Angeles. We offer competitive compensation and stock option program.

# Skills and qualifications matter in job descriptions

Same title,  
Different job

## Finance Manager Kraft Foods

Junior (3 Years)

No Managerial Experience

## Finance Manager Roche

Senior (6-8 Years)

Division Level Controller

Strategic Finance Role

MBA / CPA

### Same Title

- ✓ Same Title

- ✗ Required Education

# Research at TapRecruit

Helping companies make fairer and more efficient recruiting decisions

## NLP and Data Science:

- What are distinguishing characteristics of successful career documents?
- What skills are increasingly important for different industries?

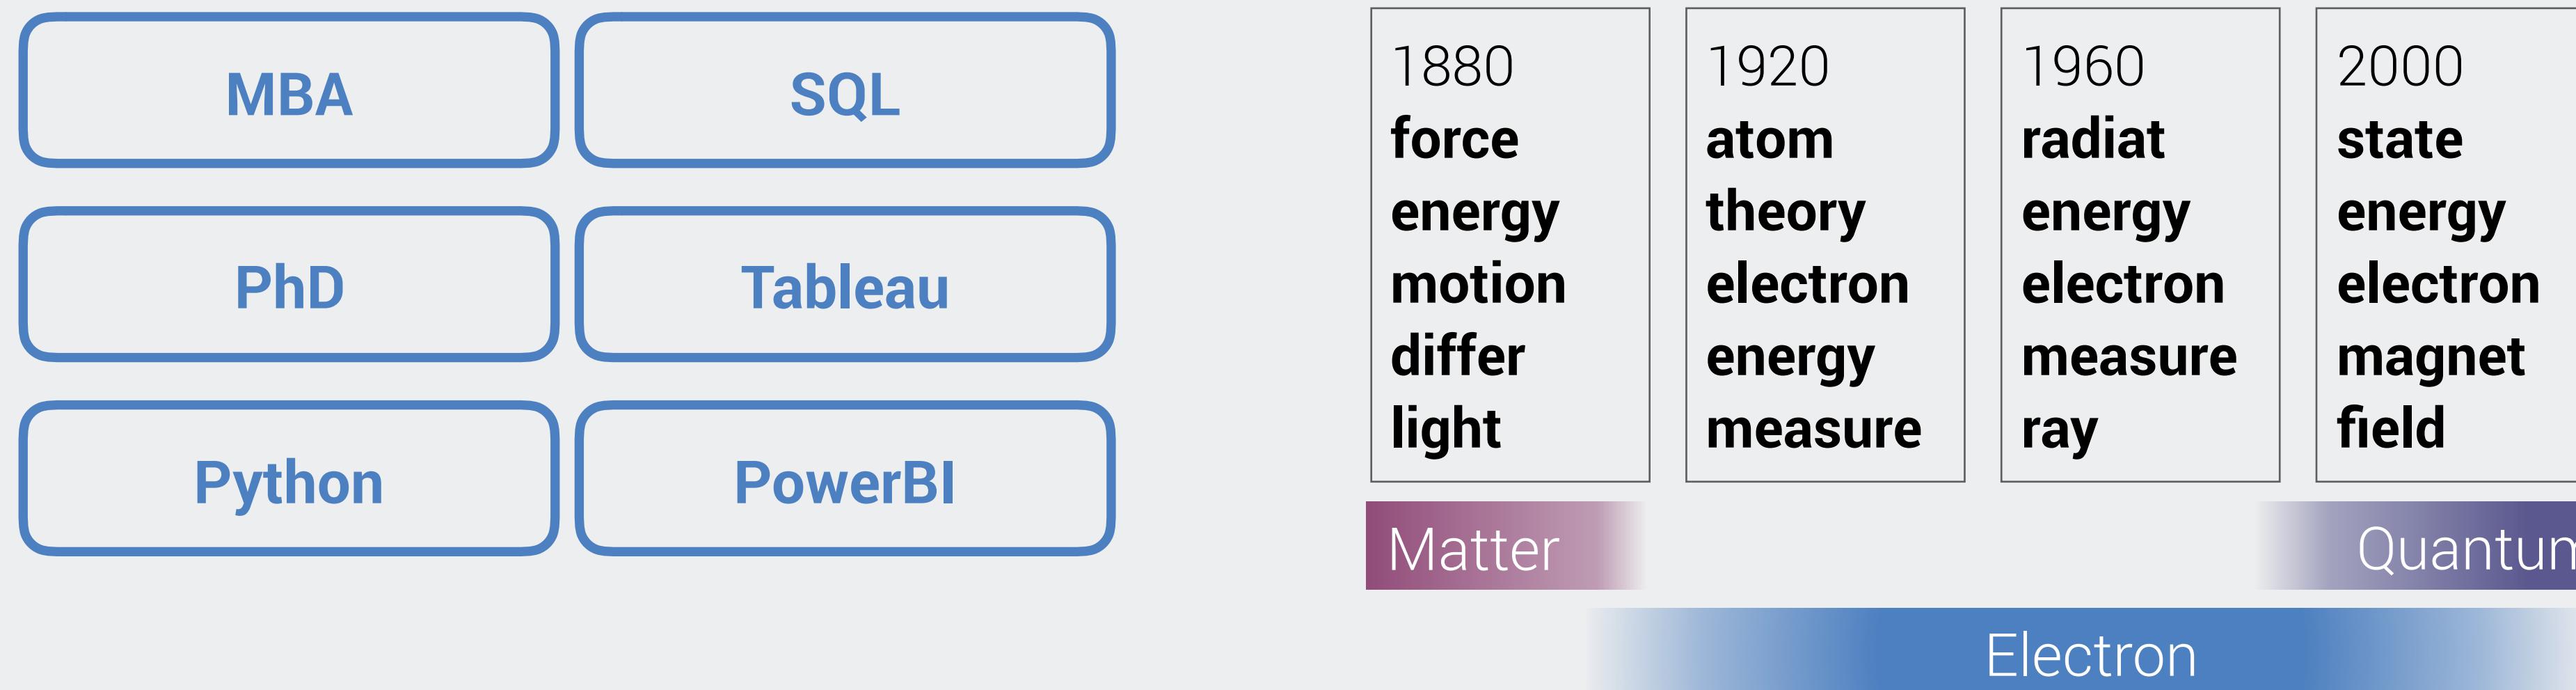

## Decision Science:

- How do candidates make decisions about which jobs to apply to?
- How do hiring teams make decisions about candidate qualifications?

How have tech skills  
changed over time?

# Strategies to identify changes among corpora

Traditional approaches do not capture syntactic and semantic shifts

## Manual Feature Extraction

Require selection of key attributes, therefore difficult to discover new attributes

## Dynamic Topic Models

Require experimentation with topic number

Adapted from Blei and Lafferty, ICML 2006.

# Embeddings use context to extract meaning

Window sizes capture semantic similarity vs semantic relatedness

Statistical modeling through software (e.g. SPSS) or programming language (e.g. **Python**)

Context

Word

Experience in **Python**, Java or other object-oriented programming languages

Context

Word

Context

Proficiency programming in **Python**, Java or C++.

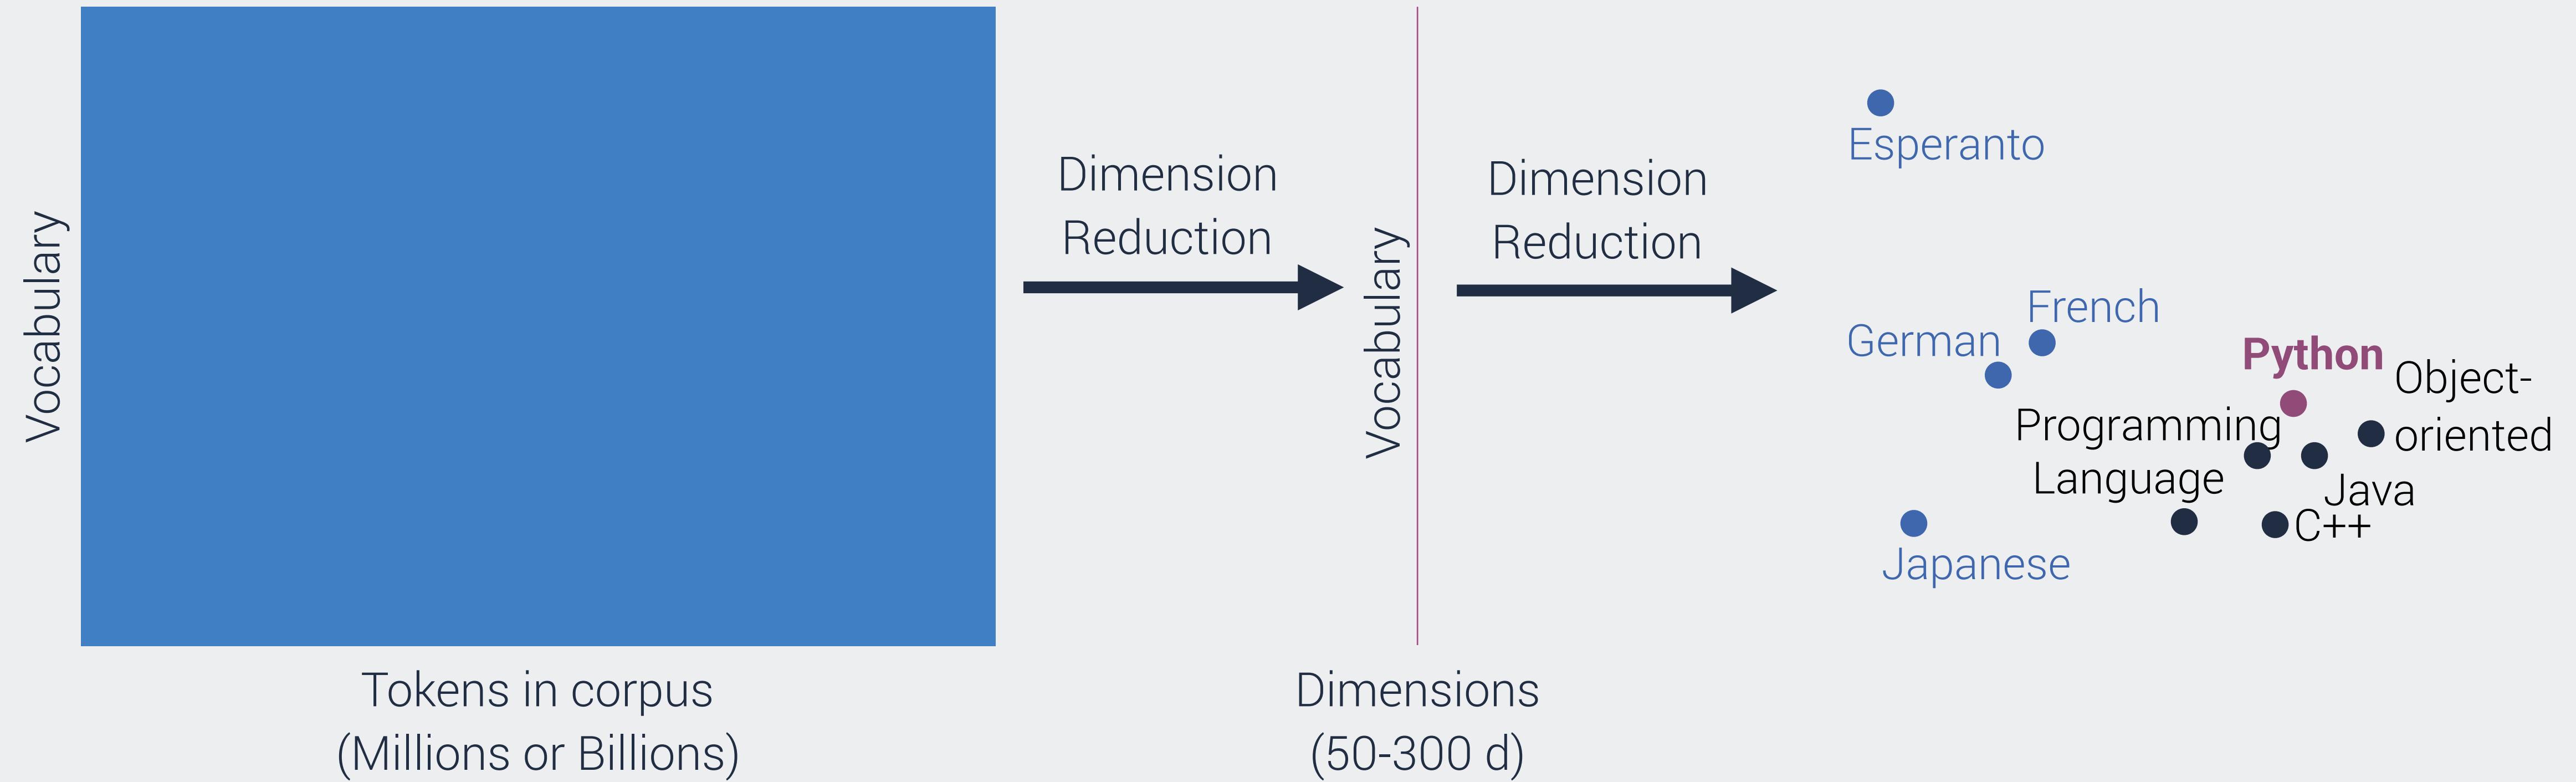

Context

Word

Context

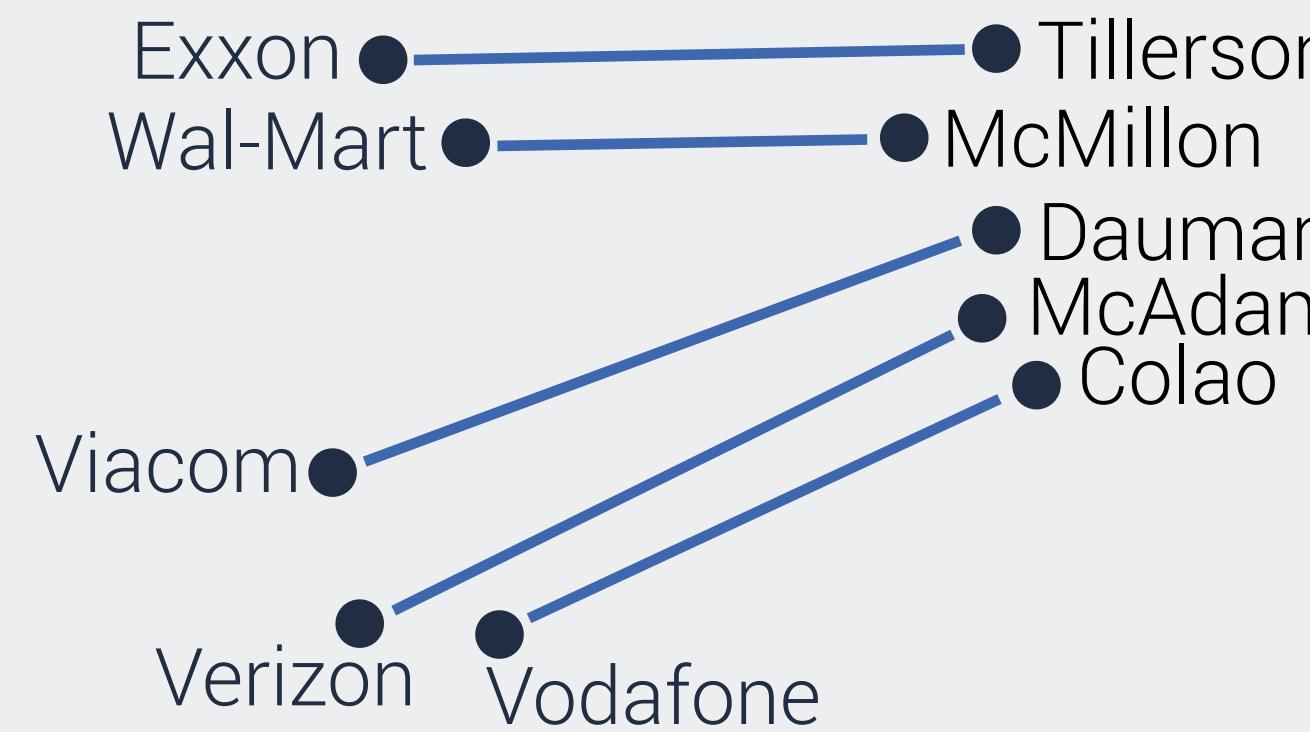

# A simplified representation of word vectors

Dimension reduction is key to all types of embeddings models

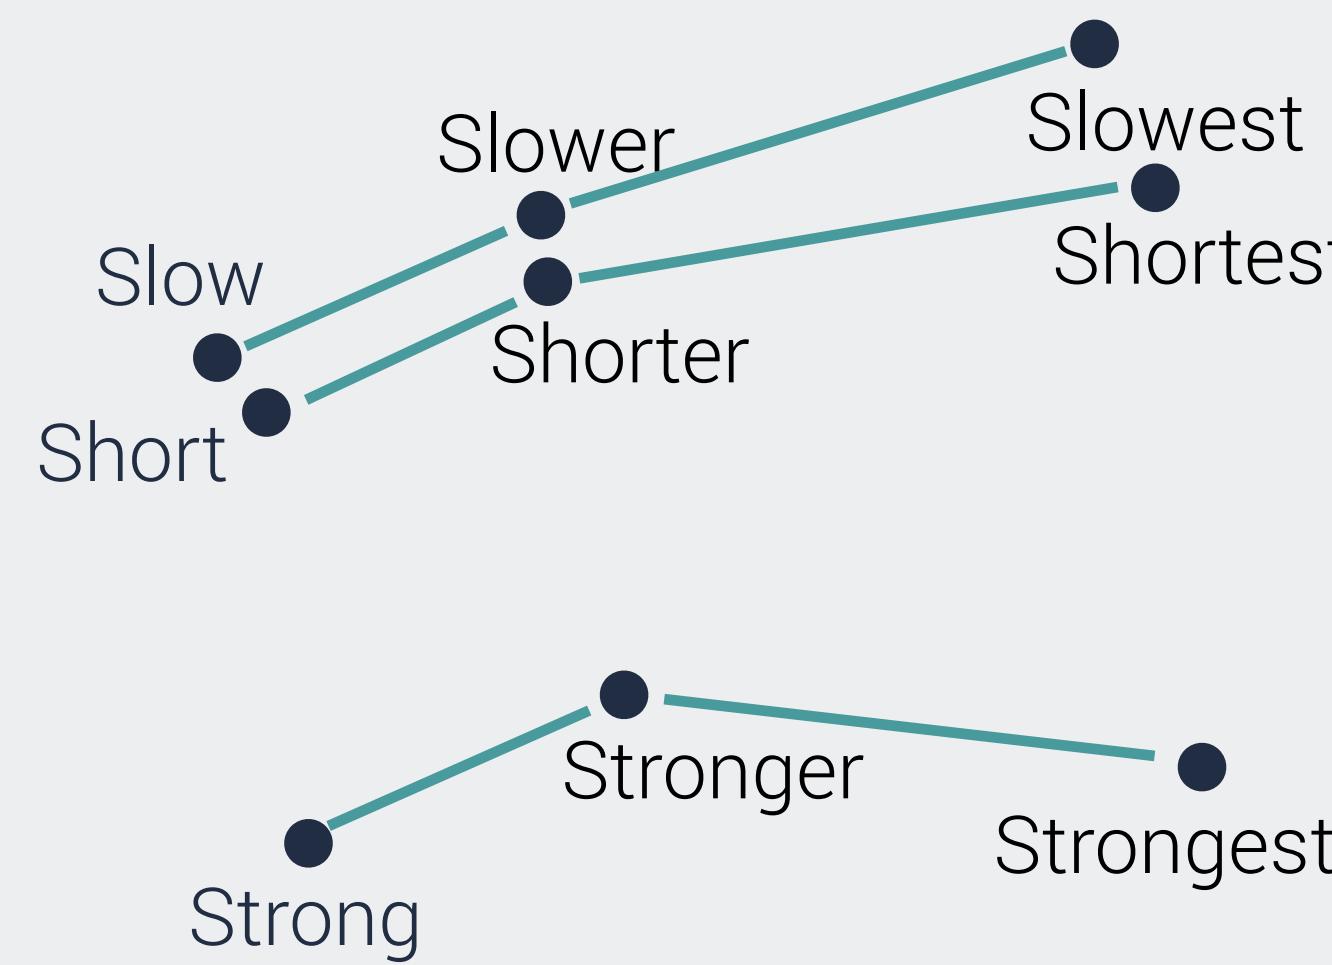

# Embeddings capture entity relationships

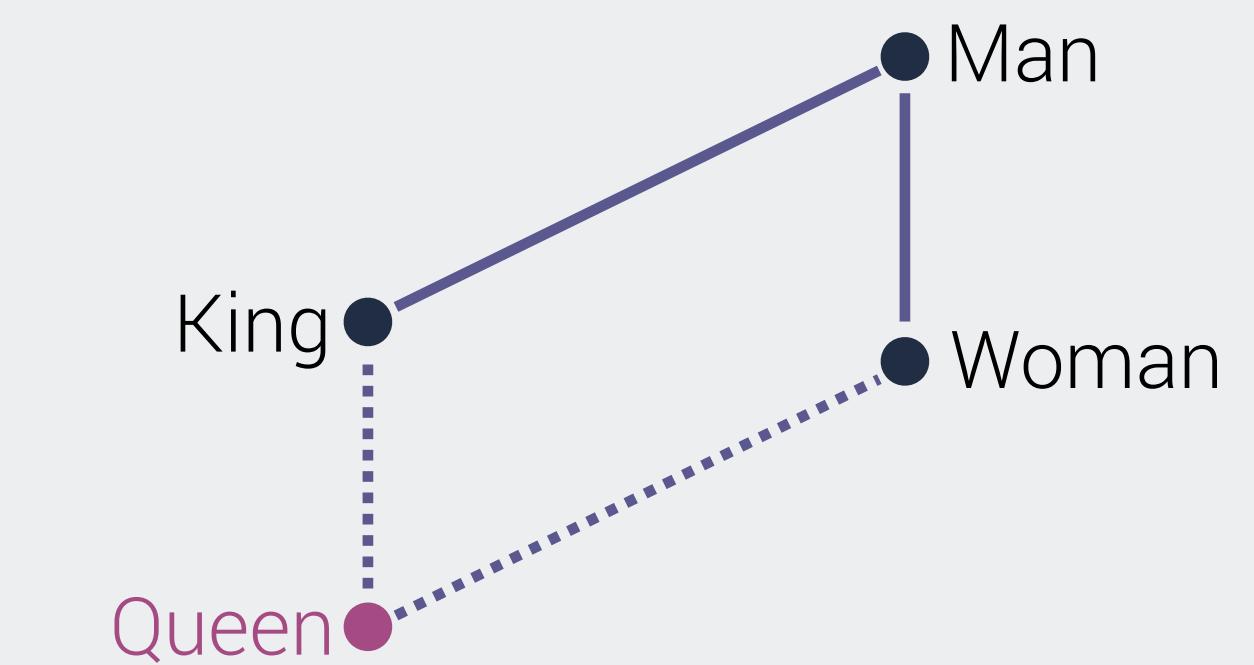

Dimensionality enables comparison between word pairs along many axes

Hierarchies

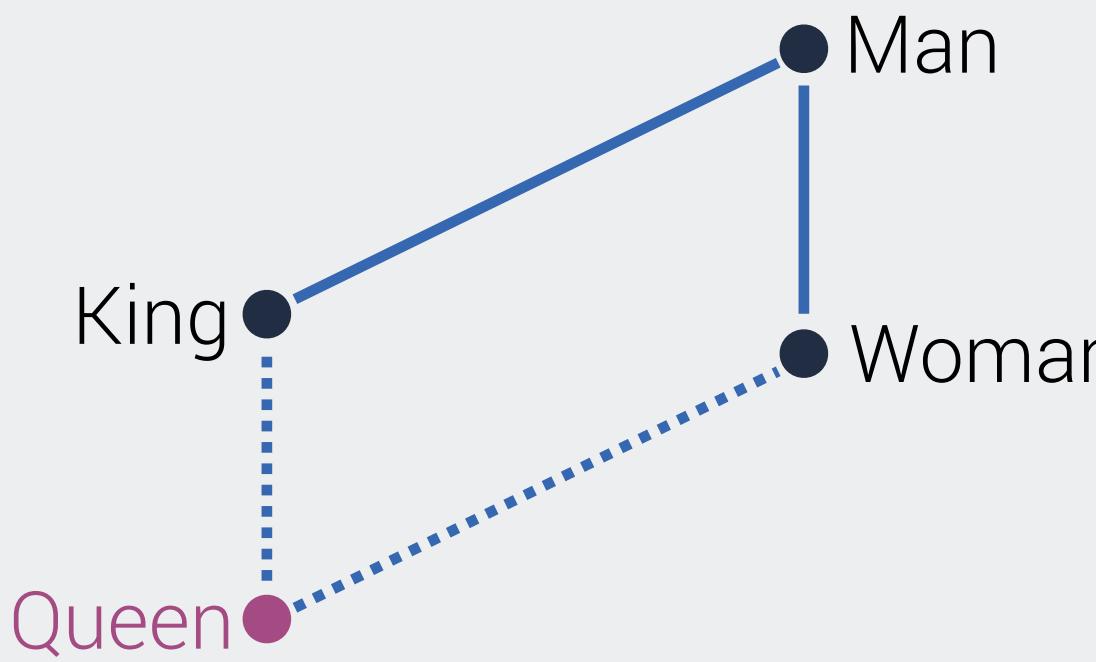

Comparatives and Superlatives

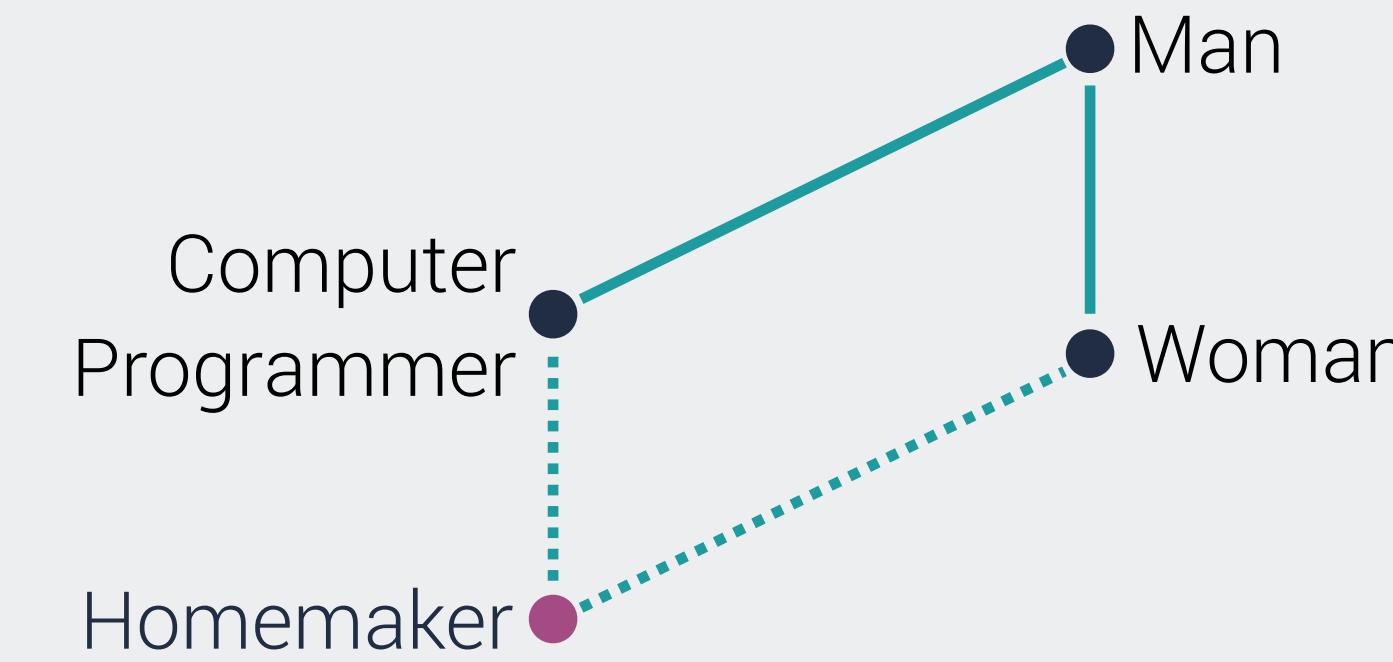

Man :: King as Woman :: ?

# Embeddings reflect cultural bias in corpora

High dimensionality enables some bias reduction

**Man :: King as Woman :: ?**

**Man :: Programmer as Woman :: ?**

Adapted from Bolukbasi et al., [arXiv: 1607:06520](https://arxiv.org/abs/1607.06520).

# Pretrained embeddings facilitate fast prototyping

Embeddings training should match corpus that is being tested on

Corpus Generation	Corpus Tokens	Twitter	Common Crawl	GoogleNews	Wikipedia
Corpus Processing	Vocabulary Size	1.2 M	1.9-2.2 M	3 M	400 k
Language Model Generation	Algorithm	GLoVE	GLoVE	word2vec	GLoVE
Language Model Tuning	Vector Length	25 - 200 d	300 d	300 d	50 - 300 d
Final Application					

# Problems with pretrained embedding models

Casing	Abbreviations vs Words e.g. IT vs it
Out of Vocabulary Words	Domain Specific Words & Acronyms
Polysemy	Words with multiple meanings e.g. drive (a car) vs drive (results) e.g. Chef (the job) vs Chef (the language)
Multi-word Expressions	Phrases that have new meanings e.g. Front-end vs front + end

# Custom language models tools

Modularized for different data and modeling requirements

**spaCy**

**CoreNLP**

**SyntaxNet**

**gensim**

**TensorFlow**

**PYTORCH**

Amazon SageMaker

## Corpus Processing

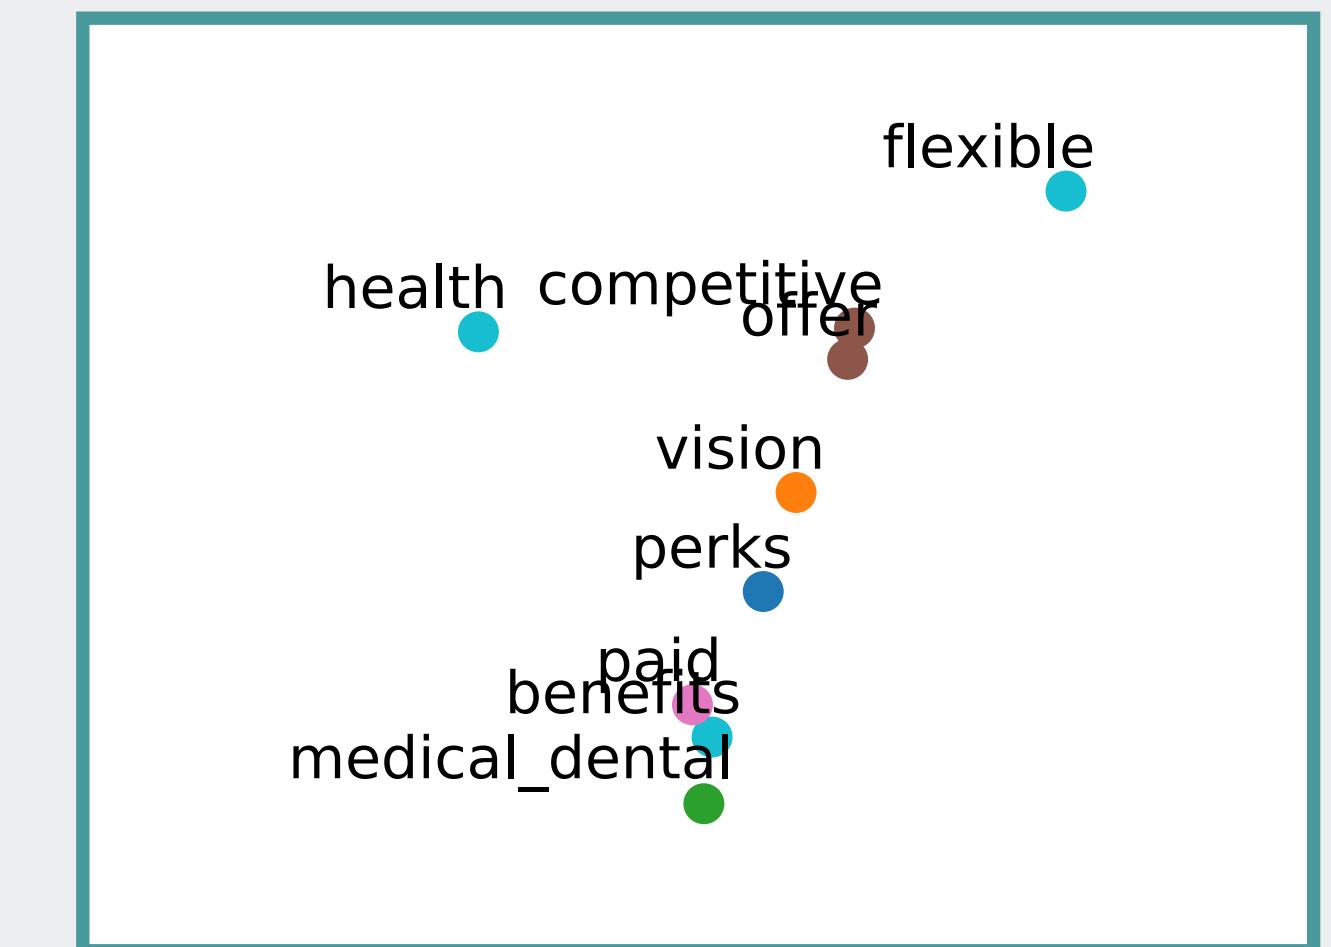

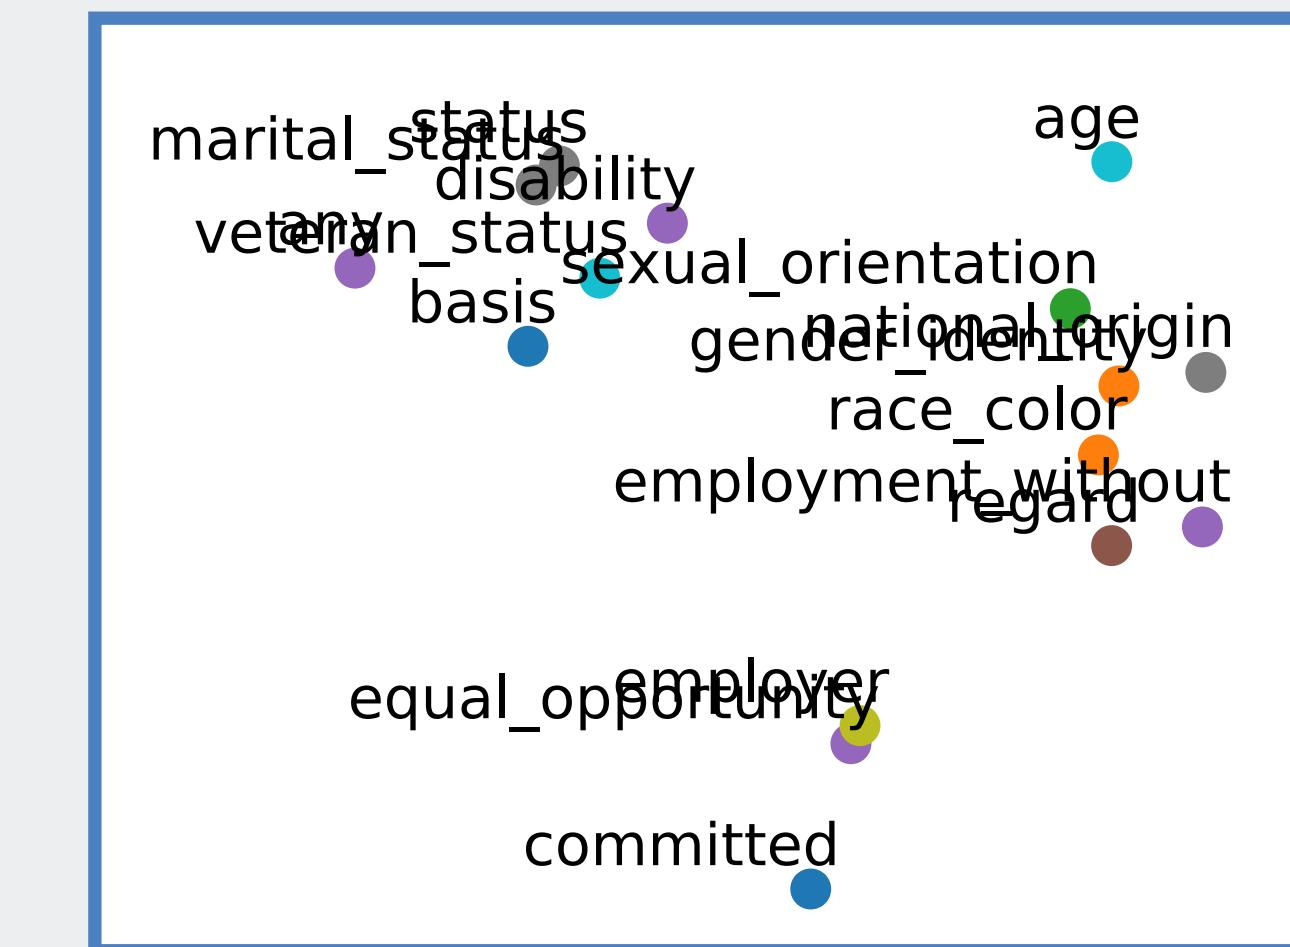

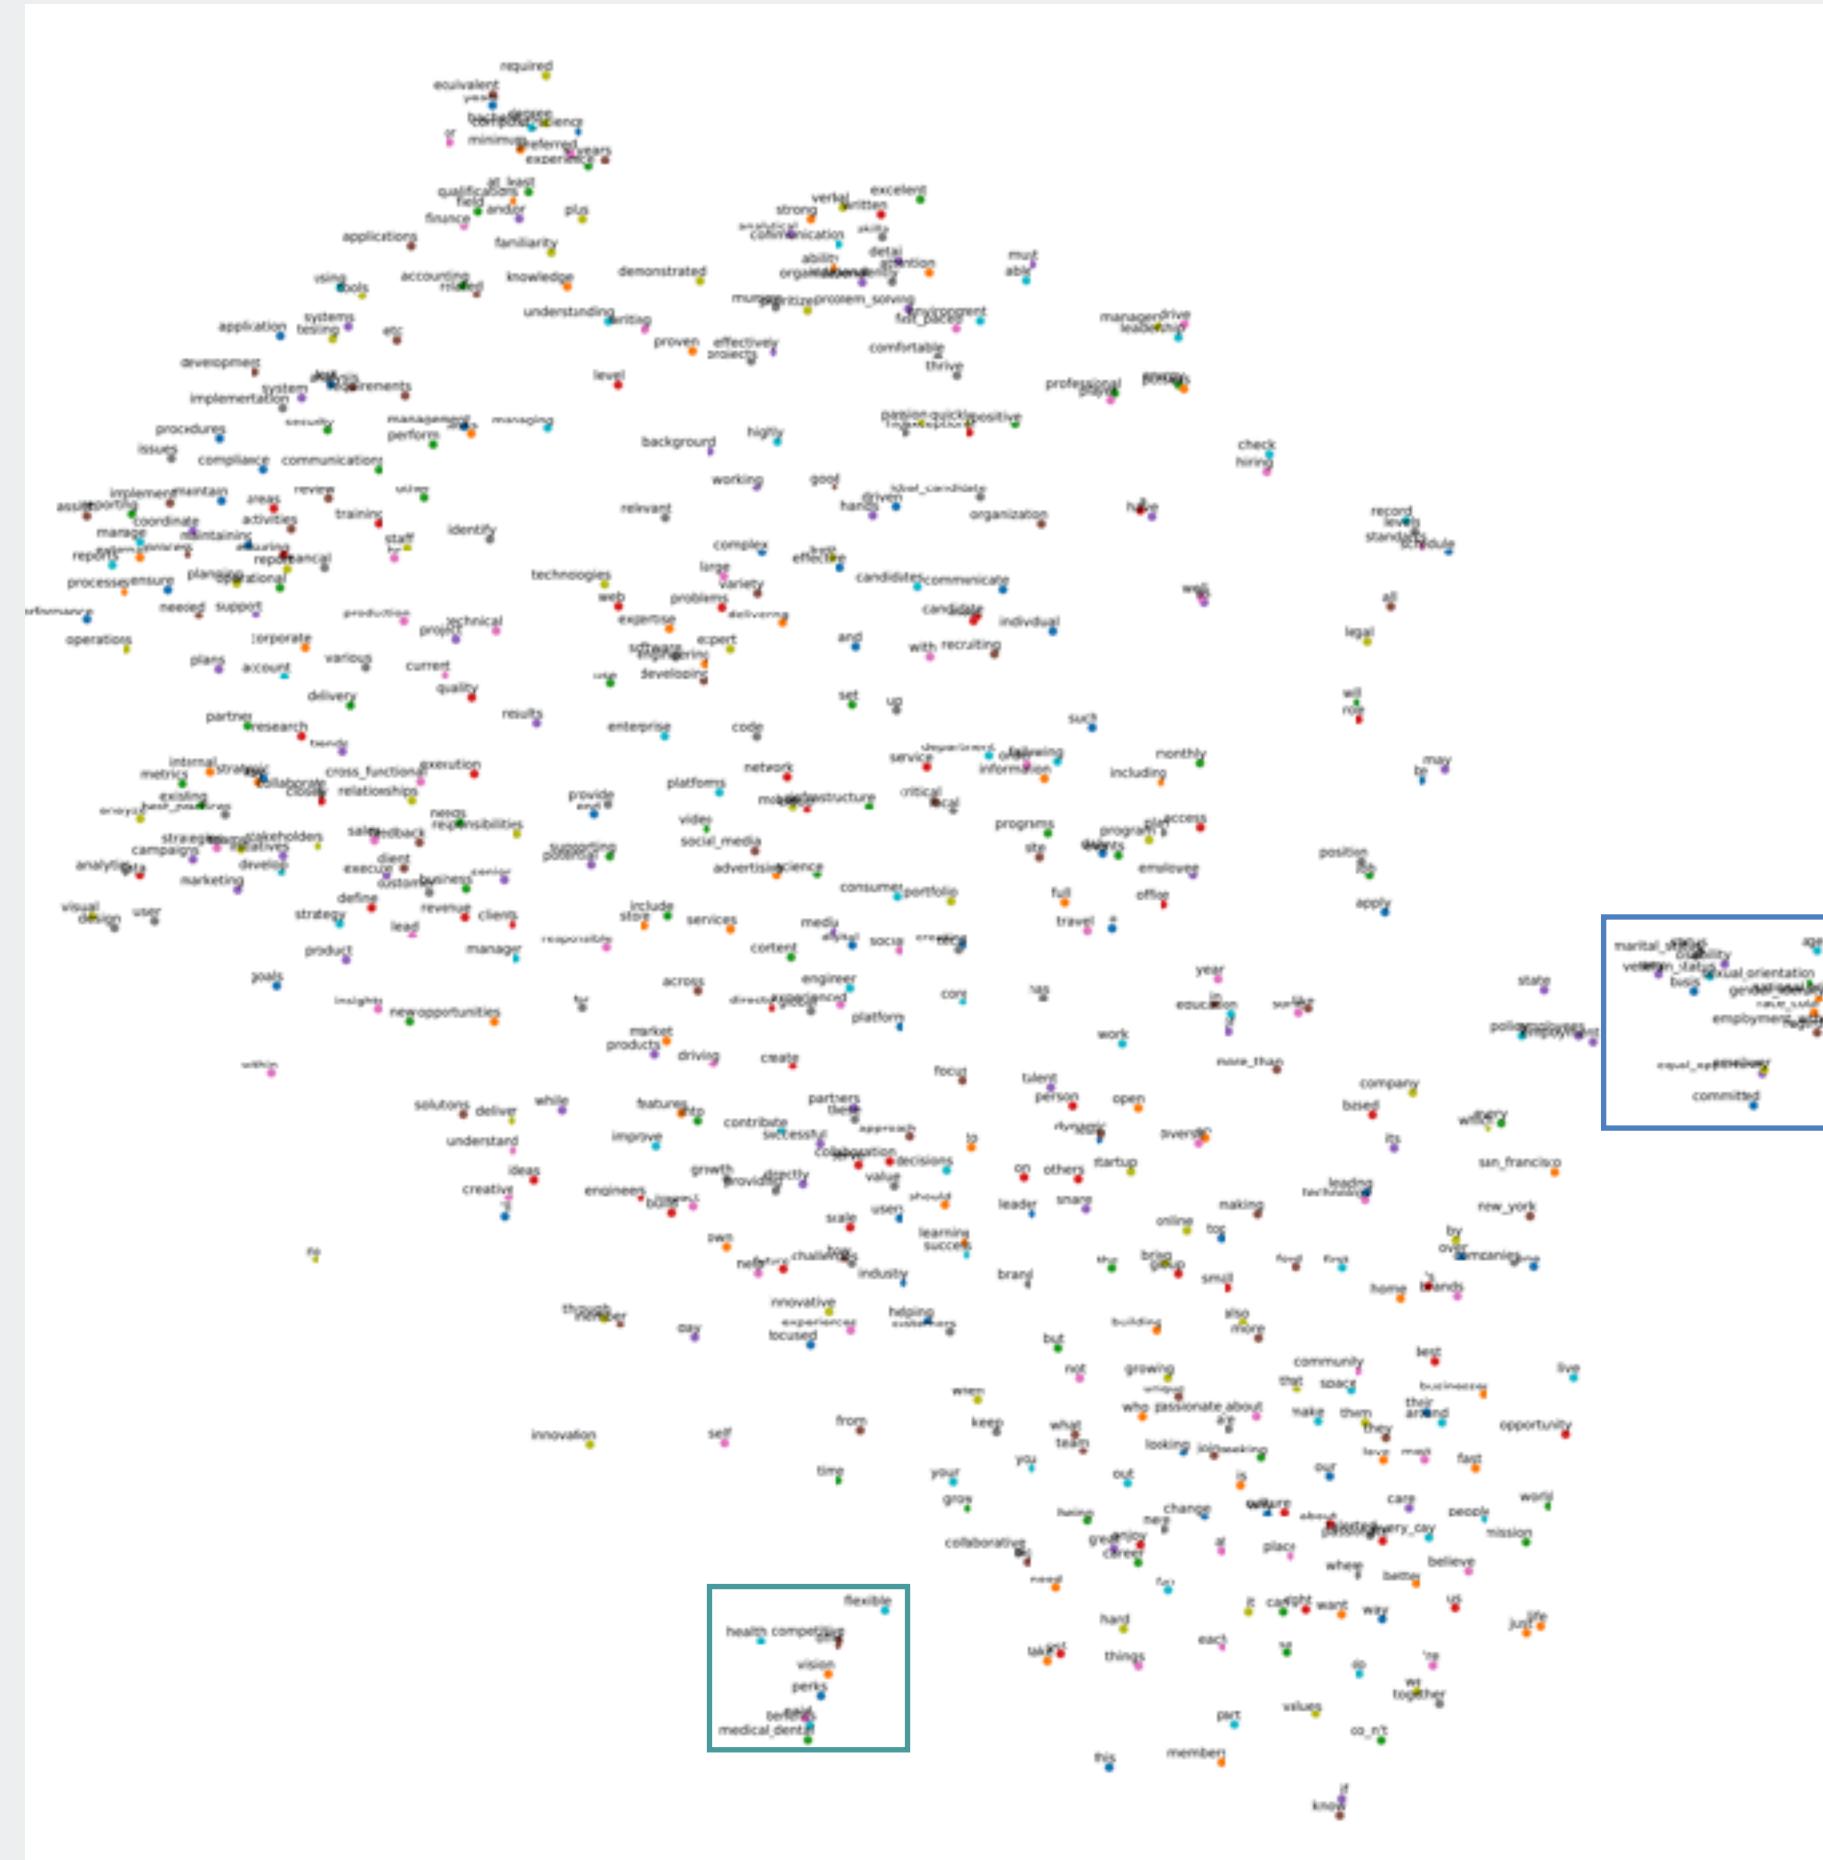

Tokenization, POS tagging, Sentence  
Segmentation, Dependency Parsing

## Language Modeling

Different word embedding models  
(GLoVE, word2vec, fastText)

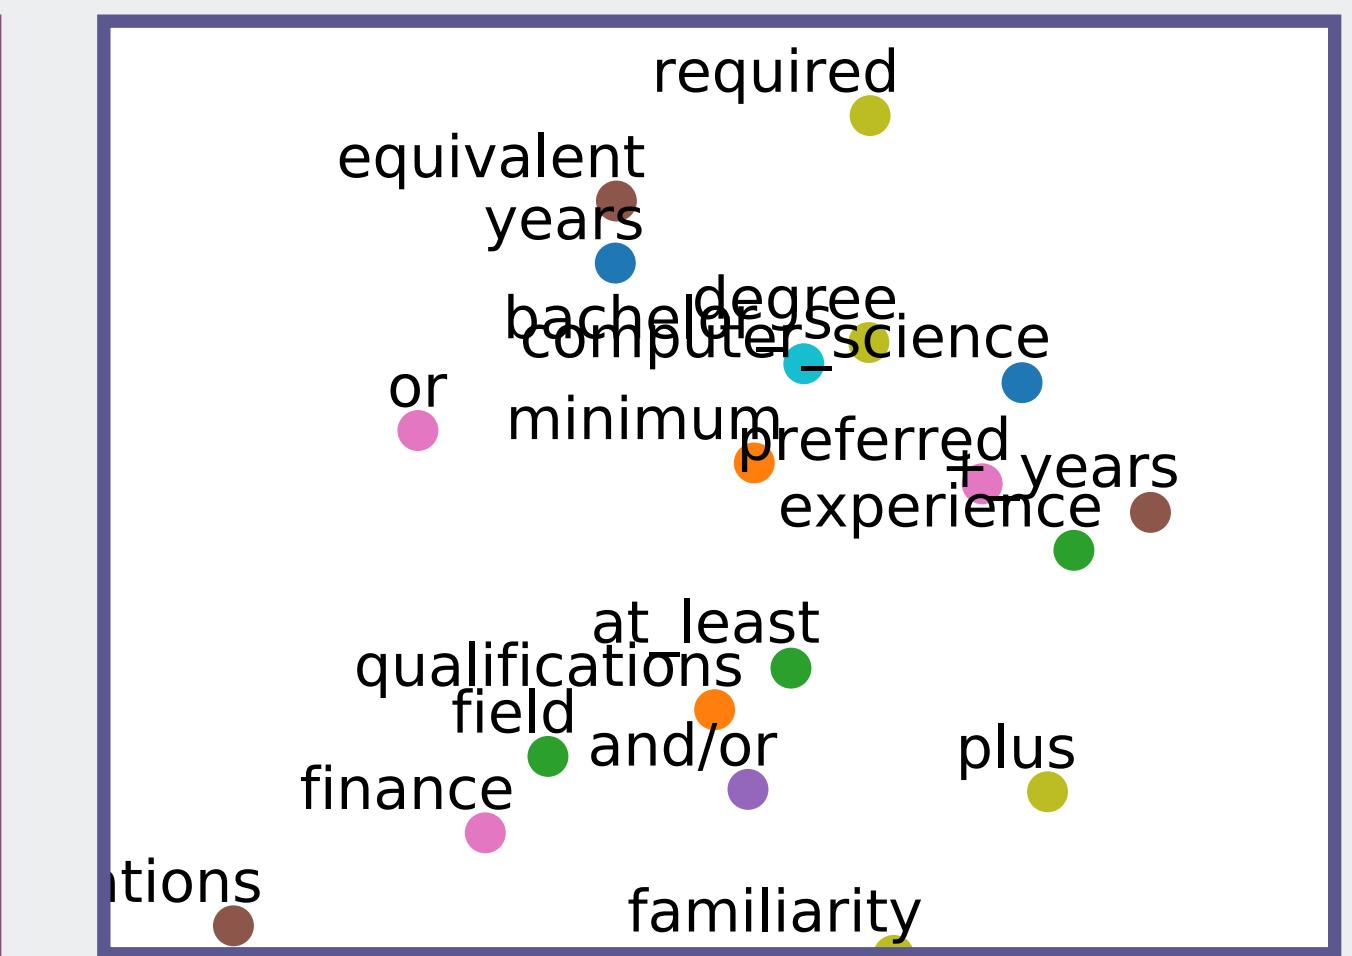

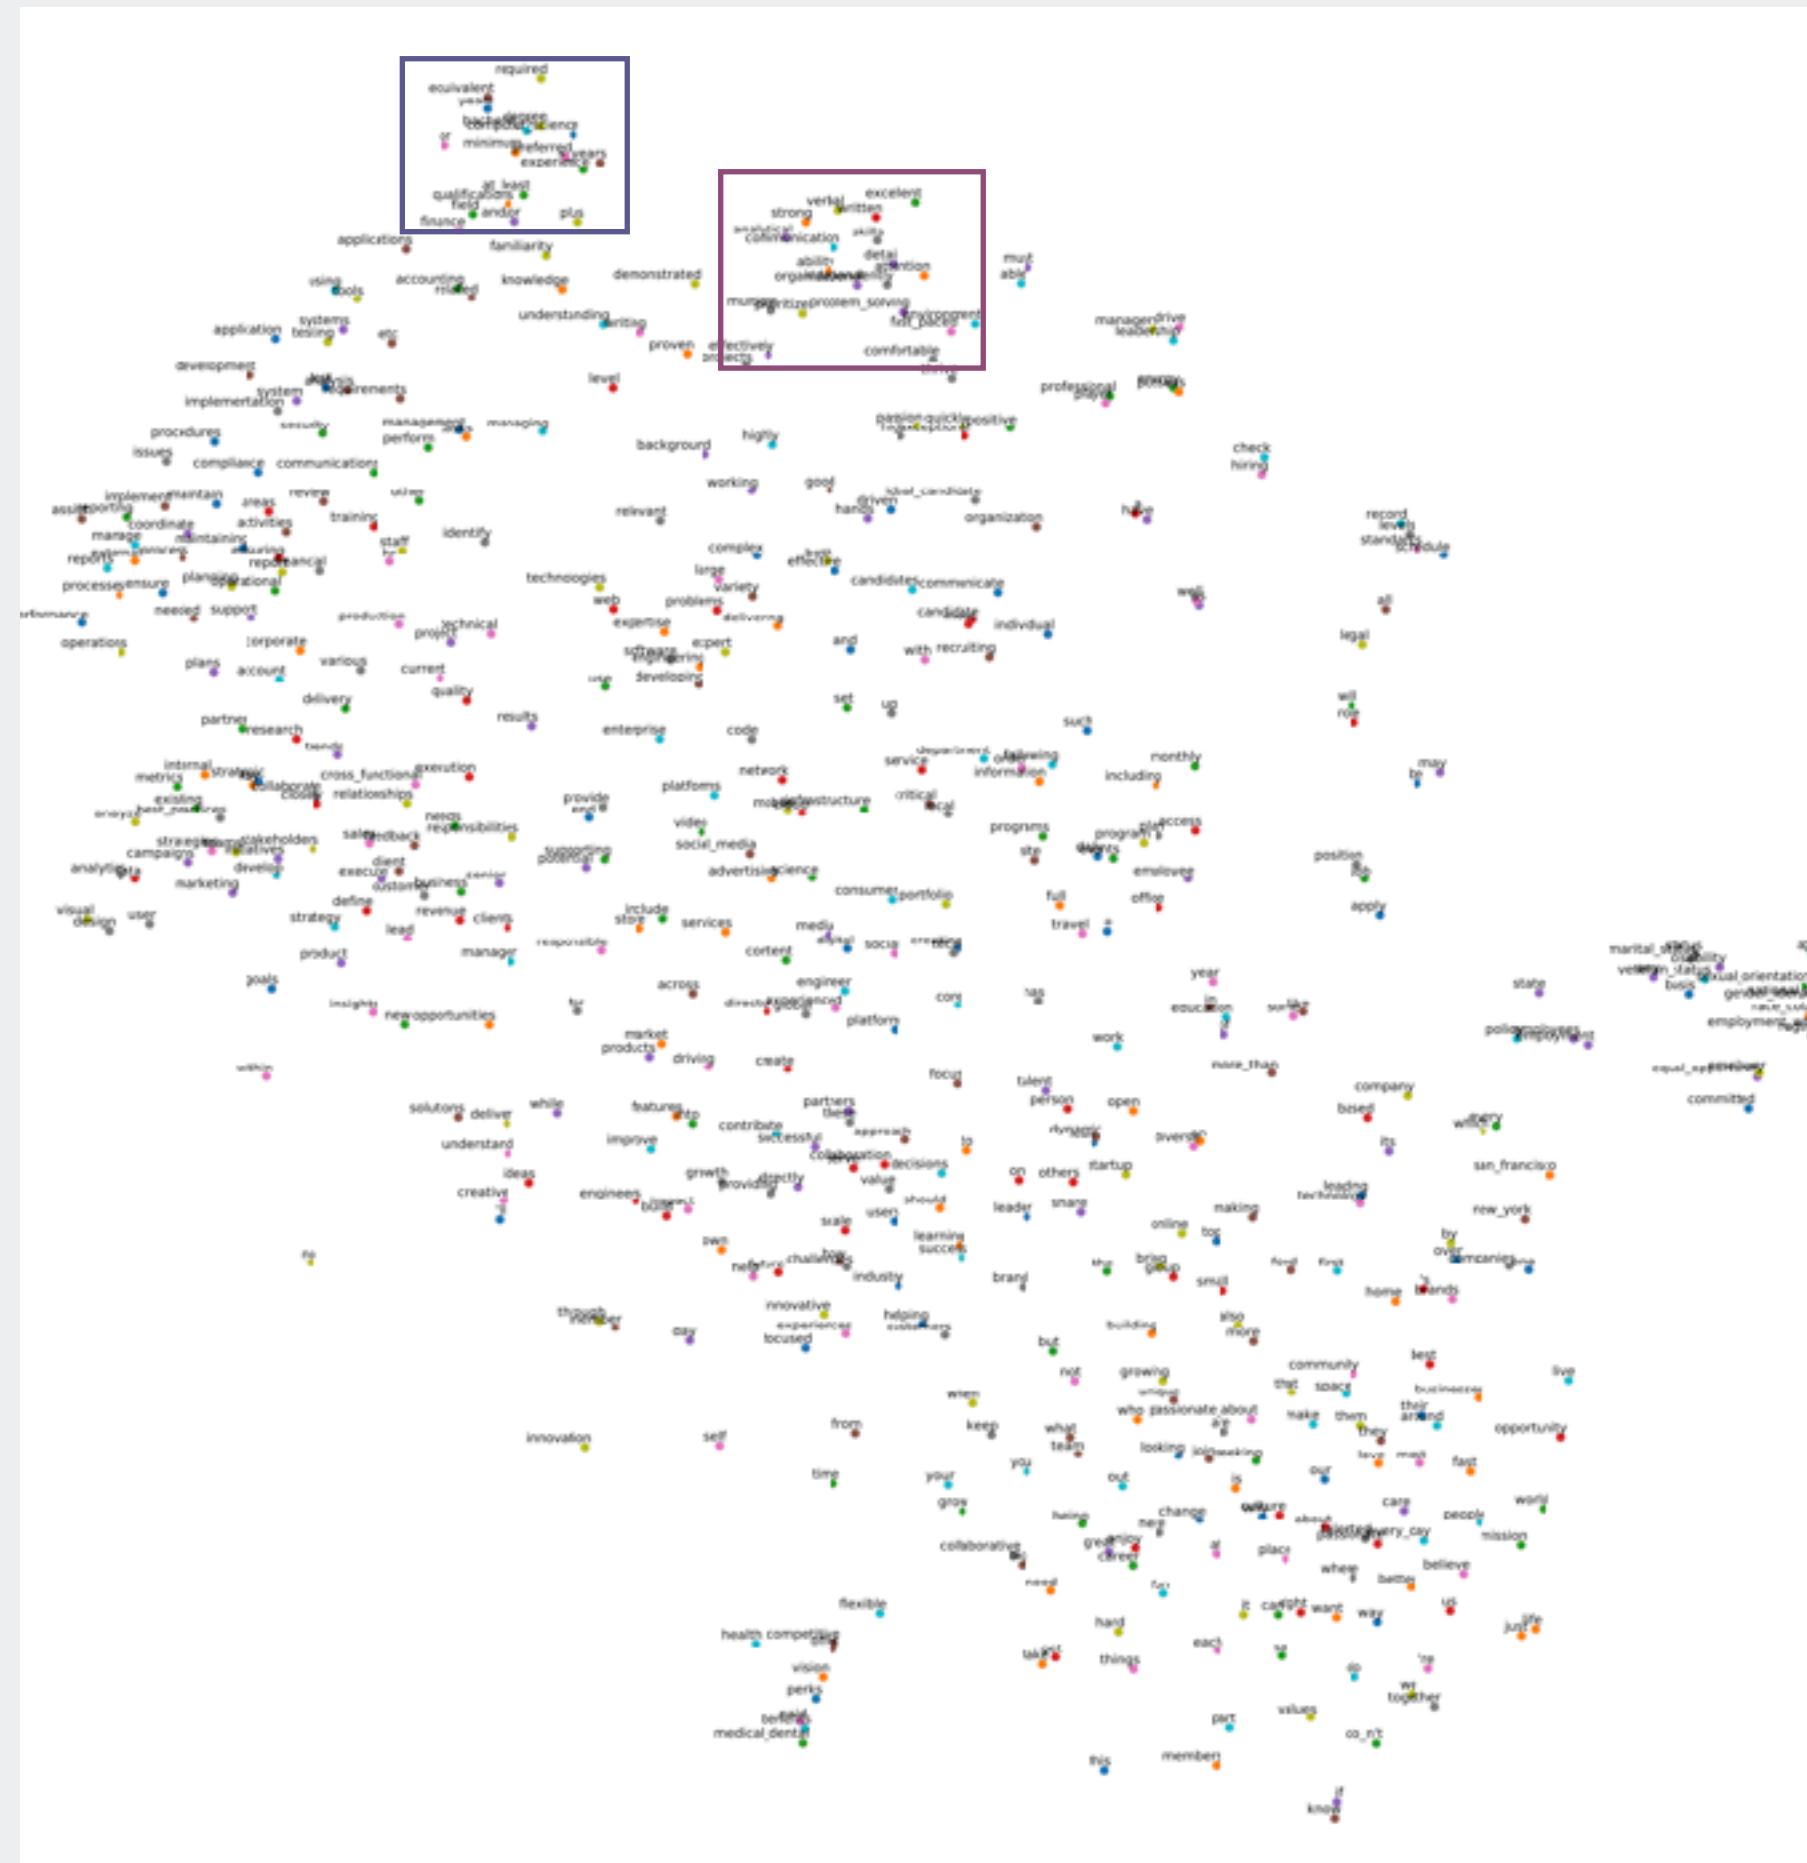

# Career language embedding model

## Identified equal opportunity and perks language

# Career language embedding model

Identified 'soft' skills and language around experience

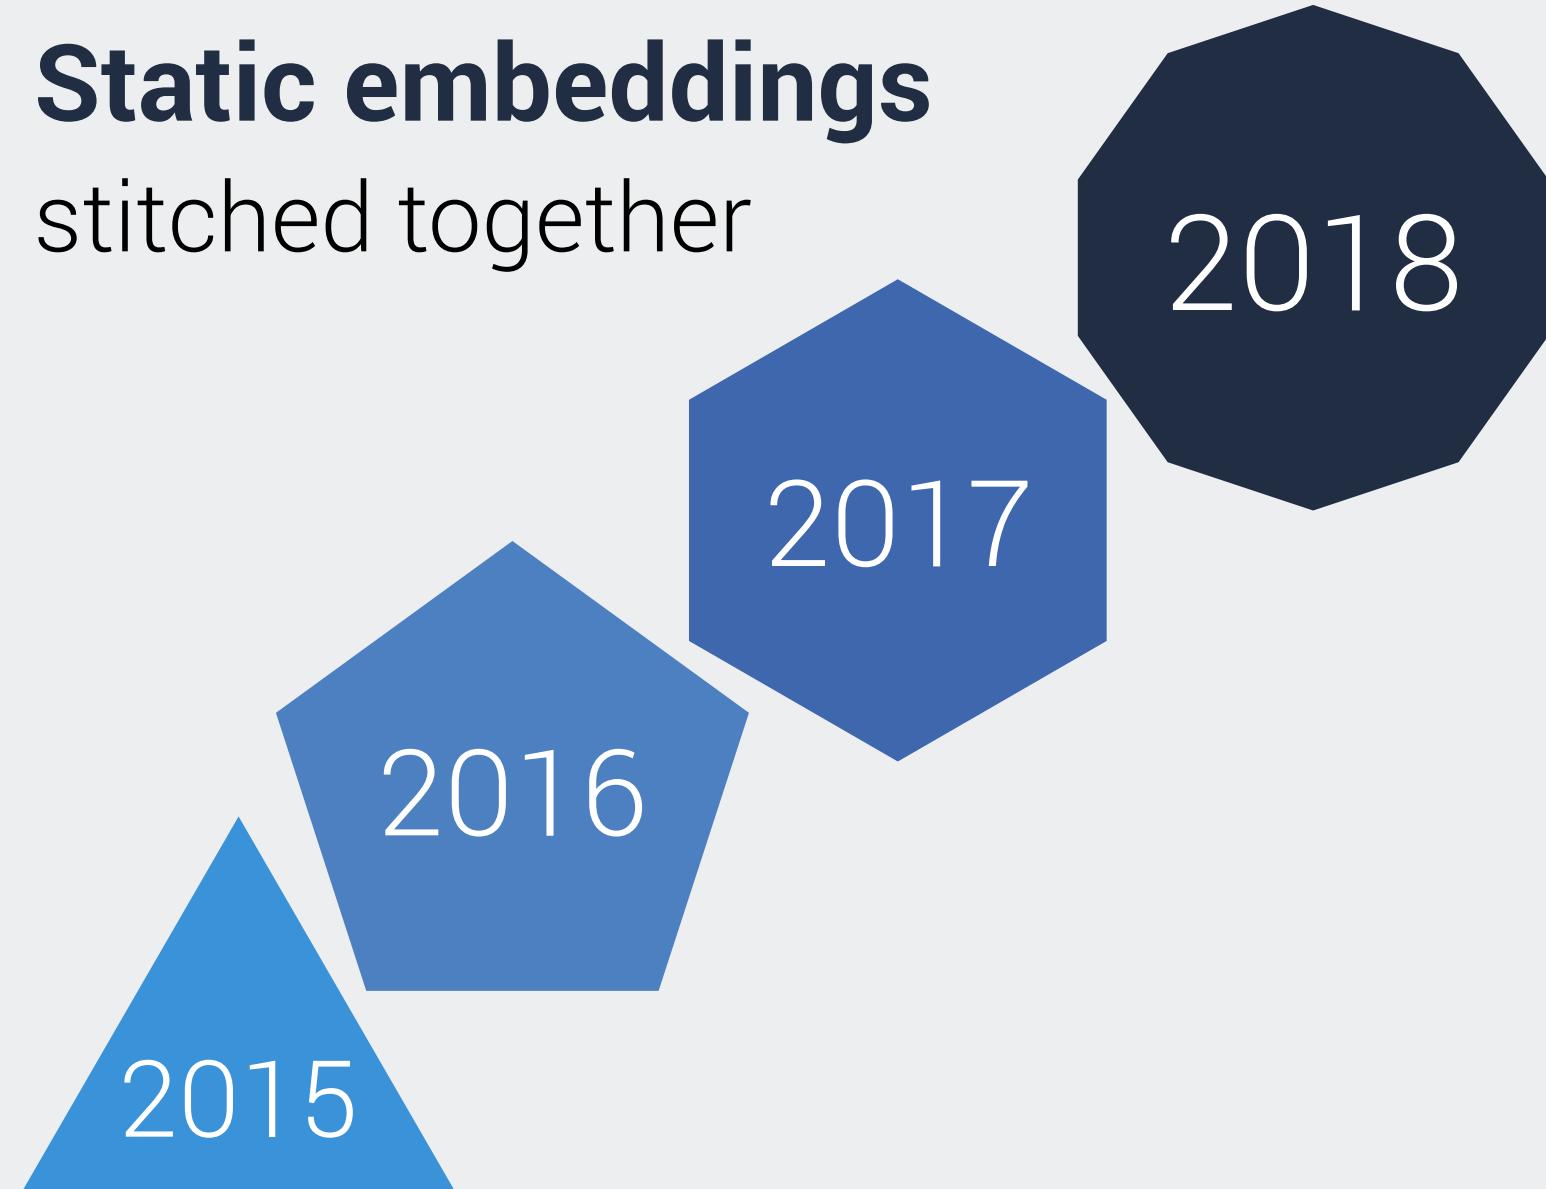

I've got 300 dimensions...  
but time ain't one

# Two approaches to connect embeddings

## Static embeddings

stitched together

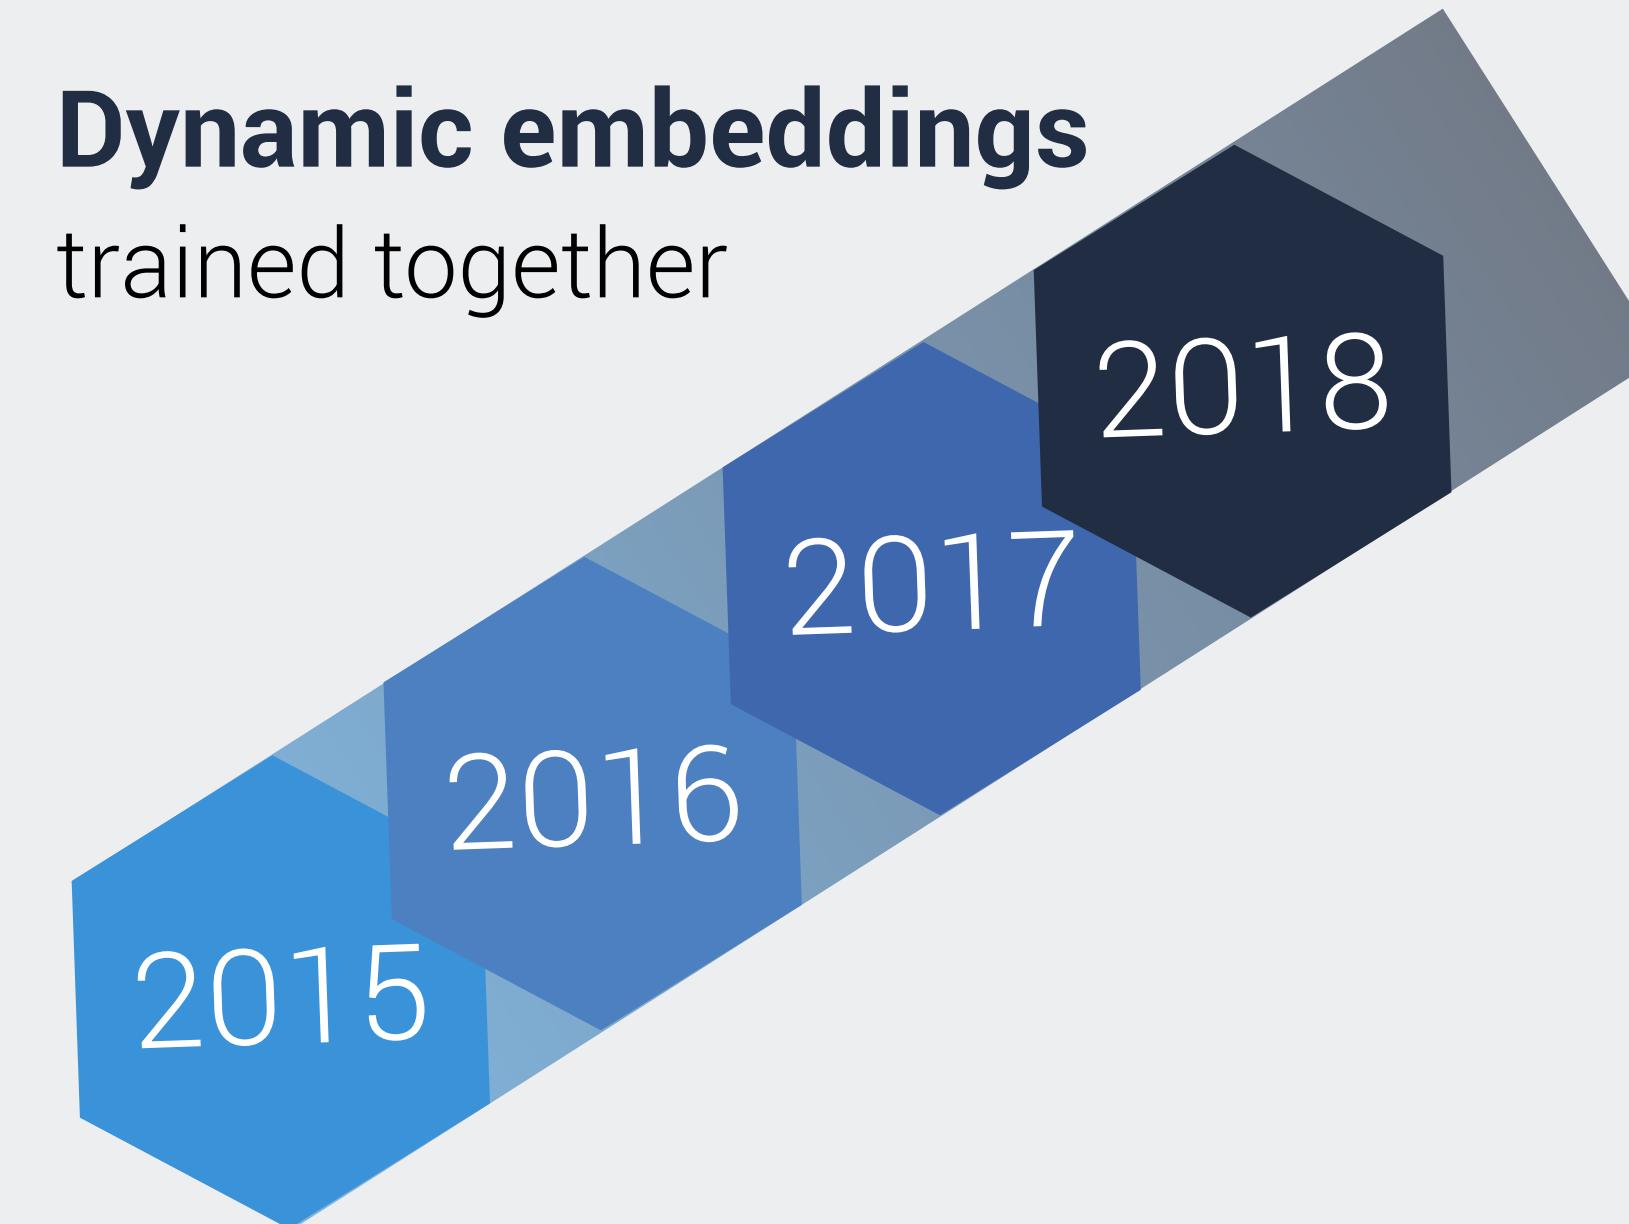

**Data hungry**  
**Requires alignment**

Kim, Chiu, Kaneki, Hedge and Petrov, [arXiv: 1405:3515](#).  
Kulkarni, Al-Rfou, Perozzi and Skiena, [arXiv: 1411:3315](#).

## Dynamic embeddings

trained together

**Data efficient**  
**Does not require alignment**

Balmer and Mandt, [arXiv: 1702:08359](#)  
Yao, Sun, Ding, Rao and Xiong, [arXiv: 1703:00607](#)  
**Rudolph and Blei, [arXiv: 1703:08052](#)**

# Dynamic Bernoulli embeddings

Outputs facilitate quick analysis of trends

## Absolute drift

Identifies top words whose usage changes over time course

words with largest drift (Senate)			
IRAQ	3.09	coin	2.39
tax cuts	2.84	social security	2.38
health care	2.62	FINE	2.38
energy	2.55	signal	2.38
medicare	2.55	program	2.36
DISCIPLINE	2.44	moves	2.35
text	2.41	credit	2.34
VALUES	2.40	UNEMPLOYMENT	2.34

## Embedding neighborhoods

Extract semantic changes by nearest neighbors of drifting words

UNEMPLOYMENT		
1858	1940	2000
unemployment	unemployment	unemployment
unemployed	unemployed	jobless
depression	depression	rate
acute	alleviating	depression
deplorable	destitution	forecasts
alleviating	acute	crate
destitution	reemployment	upward
urban	deplorable	lag
employment	employment	economists
distressing	distress	predict

<b>Number of Documents</b>	<b>50 k</b>
<b>Vocabulary Size</b>	10 k
<b>Data Preprocessing</b>	Basic
<b>Embedding Dimensions</b>	100 d

# Small corpus identified MBAs and PhDs

Reduced requirement for advanced degrees in many jobs

## Demand for MBAs is Falling

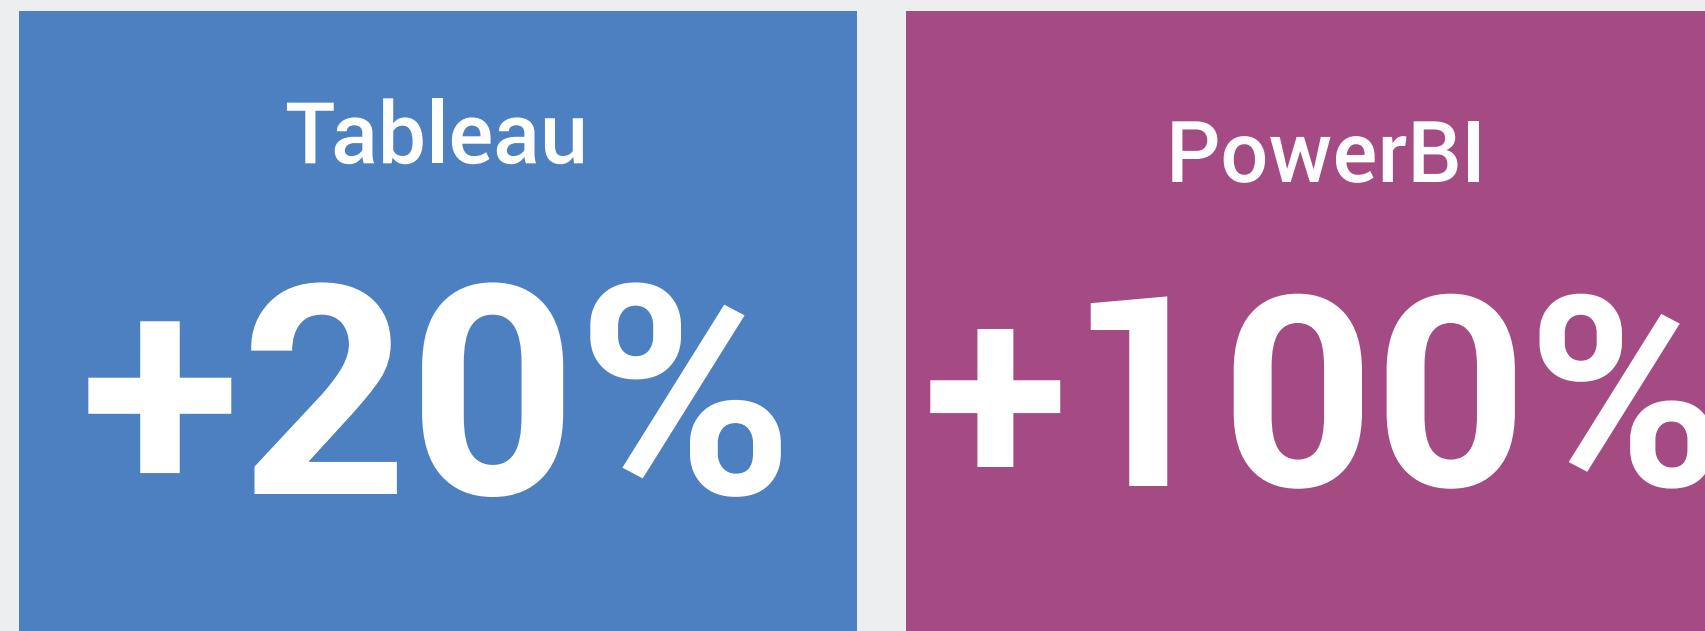

## Demand for PhDs is Falling

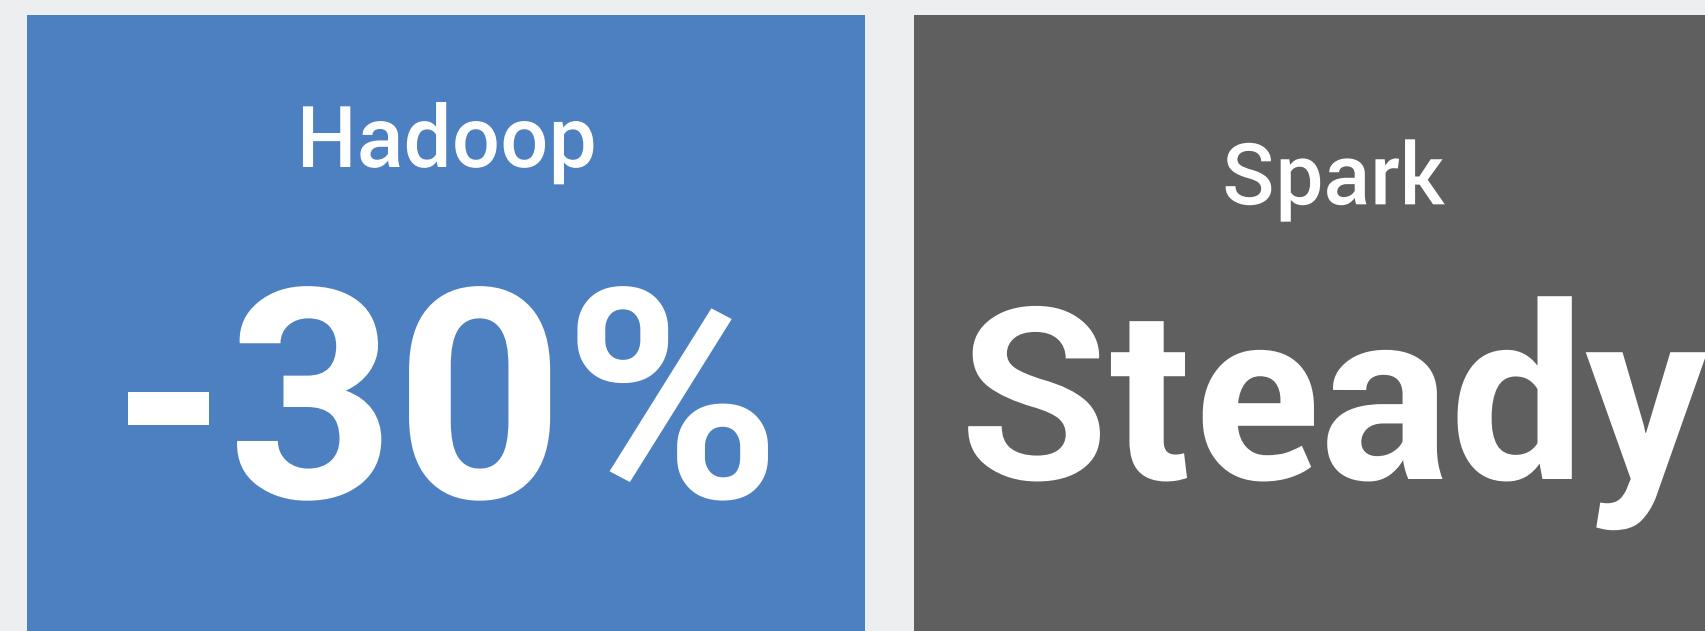

# Small corpus identified skill demands

Data Viz is up and Hadoop (but not Spark) is down

**Demand for Data Visualization tools is up**

**Demand for Hadoop is down in DS and ML roles**

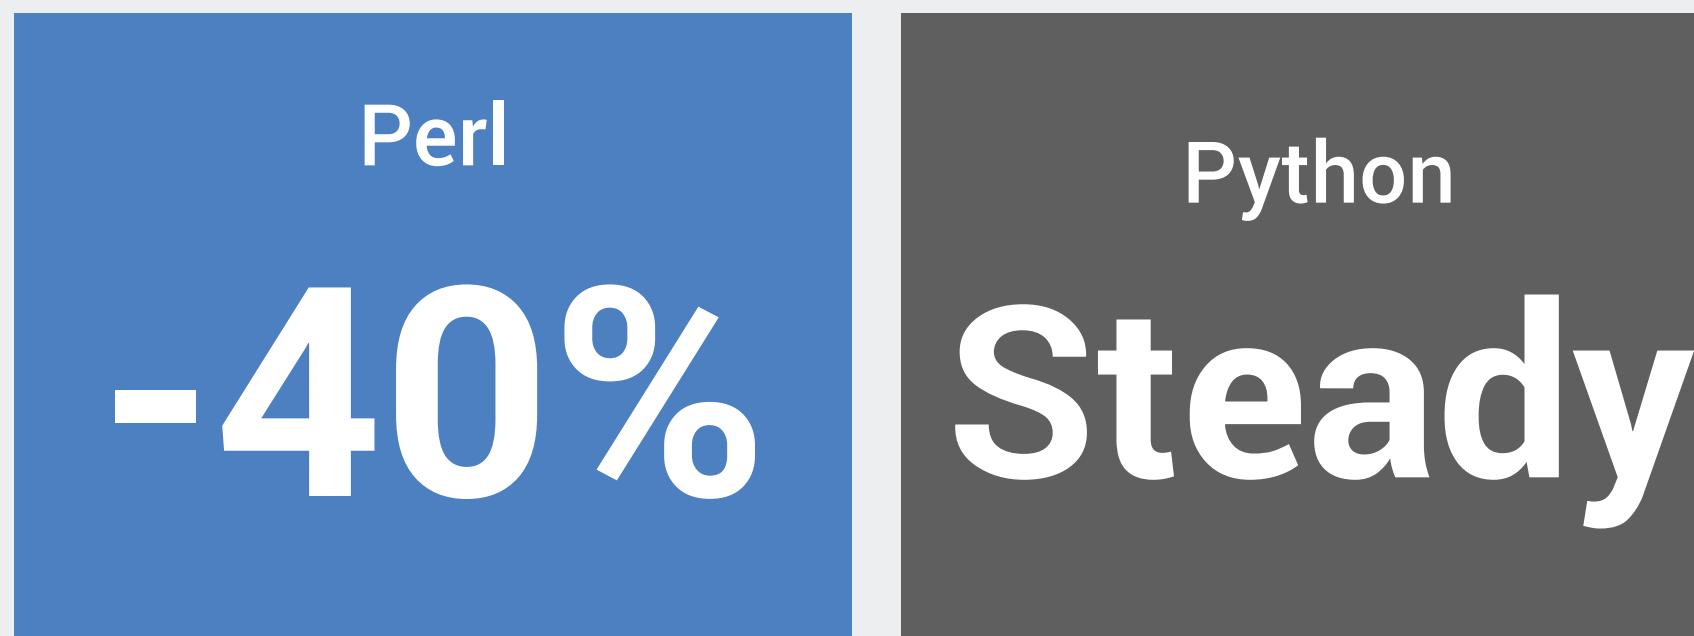

Blue boxes indicate phrases identified from top drifting words analysis. Grey and pink boxes indicate 'control' skills. tap Recruit.co

# Battle of the Languages

Difference between supply vs demand of scripting languages

**Demand for Perl is down**

- Python, the fastest-growing major programming language, has risen in the ranks of programming languages in our survey yet again, edging out Java this year and standing as the second most loved language (behind Rust).

# Battle of the Languages

Difference between supply vs demand of scripting languages

## Demand for Python up in Tech roles

Python in Tech Jobs  
**+30%**

Python in DS Jobs  
**Steady**

## Demand for Java is up

Java in Tech Jobs  
**+30%**

Java in DS Jobs  
**+35%**

- Python, the fastest-growing major programming language, has risen in the ranks of programming languages in our survey yet again, edging out Java this year and standing as the second most loved language (behind Rust).

# SQL was a top drifting word

Large corpus identified role-type dependent shifts in requirements

## Data Science & Tech Jobs

## SQL requirement increases in specific functions

# Beyond word2vec

- Flavors of static word embeddings: The Corpus Issue
- Considerations for developing custom embedding models
- Dynamic Bernoulli embeddings are robust with small datasets

# How have tech and data science skills changed?

- Demand for MBAs and PhDs is falling
- Core Skills: DataViz & Scripting Languages
- Commodification of distributed systems impacts demand for Hadoop
- Demand for SQL in a variety of core business functions

# Thank you AI Conference!
